• Potential for Expressive Behaviour of RESISTANCE to care needs, Physical (swatting, hitting), Disruptive Behavioural Symptoms/Socially Inappropriate (spitting her medication, resident urinated in the waste basket located in her room), wandering (going to other resident's room), yelling and spitting to the son related to Inability to COPE Revision on: 04/04/2025 Revision by: Maryola Perion (RN)		exit doors, elevator or other resident rooms as needed. Revision on: 03/06/2025 Revision by: Maryola Perion (RN) • ONE to ONE Care: Apr 23, 2025 (Evening shift). See Registered Staff for updates. Now 1:1 only for evening shifts. Revision on: 09/30/2025 Revision by: Ranjita Yadav (RPN) • BSO RECOMMENDATIONS: (specify intervention in easy to follow instruction) Verbal: Yelling, calling others names Triggers: Misunderstanding care needs, poor judgement, fearfulness Socially Inappropriate: Yelling out, calling out to use the washroom after she was toileted. The resident can be forgetful and accusatory of tasks not being done that have been completed. Resistance to care: Refusing medication, eating, transfers Triggers: misunderstanding care needs, poor judgement, fearfulness Recommendations: Verbal: Calmly ask the resident to lower her voice check for unmet needs. Resistance to Care: Reapproach in 10-15 minutes. Report to registered staff. Build rapport. Start a conversation and involve the son to encourage his mother to have a shower. Approach with choices to allow resident to make decisions (Ex."Would you like a shower now before breakfast or after?") Reassure the resident team member will assist with the transfer and she can wash her own body. Offer to fill the tub for her and once transferred in the tub, staff may need to turn back and give the resident some privacy as she shared she doesn't like to be washed by others. During personal care, encourage independence as much as possible. Ask the resident to take off/on her own clothes/towels.Encourage resident to pull down shirts once over her head or pull up her pants. Once in the tub, team member can hand cloth encouraging independence and team member can step back and give reassurance that the resident has privacy. The resident likes to drain the tub after and hand shower head as she will rinse off. Socially Inappropriate: Gently redirect her that she just used the washroom. Ask if she needs anything. Assess for unmet needs. Monitor for signs of pain and infection. The resident enjoys visits with her son, talking about her family, life in Serbia and watching TV.

Care Plan Report

Focus	Goal	Interventions	Position	Freq/Resolved
• Potential for Expressive Behaviour of Physically expressive towards the team (grabbing team members, Pinching the team, attempting to bite the team), Verbally expressive towards the team (cursing towards the team), Socially inappropriate spitting out medication at staff, calling out out of nowhere related to Alzheimer's Disease. Revision on: 08/10/2024 Revision by: Jenny Liu (RAI Coord Back-up)		• SOCIALLY Inappropriate Behaviour: If Sharon is noted to (make loud disruptive noises in the dining room/program/care (calling out), etc.) move to a quieter area, etc. Revision on: 08/16/2024 Revision by: Maryola Perion (RN)		
		• SOCIALLY Inappropriate Behaviour: If Sharon is noted to (spitting on floor, spitting her medication, etc.) clean area using appropriate PPE. Report episode to Registered Staff. Revision on: 11/16/2023 Revision by: Maryola Perion (RN)	PCA	
		• MEDICATION: Administer medication for therapeutic treatment of Expressed Behaviour as per MD Order. Monitor effectiveness and for side effects. Revision on: 11/26/2022 Revision by: Maryola Perion (RN)	Registered Practical Nurse RN	
		• BSO RECOMMENDATIONS: (specify intervention in easy to follow instruction)The resident can have verbal and physical Expressions during care. Staff to use stop and go approach and explain what is being done prior to care and obtain consent, provide comfort and reassurance. The resident has a stuffed bear that can be given to her during care and have conversation about it. Use proper sling for mechanical lift to avoid discomfort. Offer food during the night if the resident is unable to sleep.The resident likes to listen to 70's music and enjoys socializing. External BSO Recommendations: A. Upon approach, make eye contact, smile and greet resident. Ask permission and softly touch the resident's hand, and explain what steps are going to take place. Wait a moment to allow muscles to relax. B. Suggest 2 team members provide personal care for both safety and distraction techniques. C. Suggest hand posey's to reduce risk for harm if resident grabs out. If not available, trial stuffed animal or small pillows. D. Do as much care as possible on one side before turning resident to the other side to reduce back and forth moving. E. The slower the team moves residents body parts the less resistance they may experience. F. Explain each step, use stop and go approach if resident becomes too reactive. Attempt to distract residents thought process by talking to her or playing soothing

Last Care Plan Review Completed: **09/06/2025**

Focus	Goal	Interventions	Position	Freq/Resolved
		He would like to wear a sweater in the warmer months when he is cold. Revision on: 08/29/2025 Revision by: Maryola Perion (RN)		
		• EATING: Paul eats in the main floor dining room and is able to feed himself with supervision and set up from a staff member. Remind and encourage Paul to go down for his meals and ensure that he stays to eat. Paul prefers to have his breakfast in the dining room before scheduled service start time. Revision on: 03/11/2025 Revision by: Danielle Loreto (RAI Coordinator)	PCA	
		• LOCOMOTION: Paul requires the use of a wheelchair as his mode of locomotion. He is able to propel it on and off the unit but may require one staff assistance at times. Paull will try to get up and walk by himself which puts him at risk due to weakness, impaired balance and/or unsteady gait. Staff to assist when needed and put him back safely in his wheelchair. Remind Paul to stay in his wheelchair and to ask for assistance as needed. Revision on: 09/23/2025 Revision by: Maryola Perion (RN)	PCA	
		• PERSONAL HYGIENE: Paul requires one staff to check and provide peri-care as needed due to incontinence episodes and unable to clean himself properly. Paul is encouraged to ask for assistance as needed. Staff to shave him as needed. Revision on: 11/18/2024 Revision by: Maryola Perion (RN)	PCA	
		• TOILET USE: Paul is a 2 person assist to transfer on and off the toilet and to adjust his clothes. He may require 2 staff assistance at times to assist in changing his incontinent product and to provide peri care. Paul is encouraged to ask for assistance as needed. Revision on: 08/28/2025 Revision by: Idylle Labrado (RPN)	PCA	
		• TRANSFERRING: Paul is 2 person transfer Revision on: 08/28/2025 Revision by: Idylle Labrado (RPN)	PCA

• Potential for Expressive Behaviour of wandering, verbally abusive, physically abusive (scraped/ scratch right hand of PSW while giving care, yelling/grabbing/hitting kicking and insulting/name calling staff during care), socially inappropriate, resisting care related to Alzheimer's Dementia. Revision on: 08/17/2024 Revision by: Maryola Perion (RN)		Revision on: 07/03/2023 Revision by: Maryola Perion (RN) • WANDERING: Permit Emma to safely roam in common area. Redirect away from exit doors, elevator or other resident rooms as needed. Revision on: 03/22/2023 Revision by: Katie Wolters-Savo (RAI Coordinator) • MEDICATION: Administer medication for therapeutic treatment of Expressed Behaviour as per MD Order. Monitor effectiveness and for side effects. Revision on: 11/19/2024 Revision by: Maryola Perion (RN) • BSO RECOMMENDATIONS: Physical: hitting, kicking, scratching Triggers: Anger, frustration, confusion, sundowning, pain, infection Verbal: Yelling, insulting staff and residents,swearing, accusatory toward staff Triggers: Pain, unmet needs, confusion, sundowning Socially Inappropriate: Screaming, throwing food, making disruptive noises in public areas Triggers:Anger, confusion, delusional, pain, infection Resistant to care: Refusing care (bath, changing of clothes and brief) meals, medication Trigger: Misunderstanding of care needs, confusion, pain Recommendations: Move away from her reach. Use stop and go approach. Re approach when the resident is calm/ready. 2 staff for care due to the resident's accusatory tendencies. Monitor for pain and infection. Attempt to resolve her concerns. Distract with conversation from her personhood. Offer validation, reassurance and support when the resident is verbalizing negative thoughts or wanting to leave to find her parents. The team is able to redirect her at times when they are able to validate her feelings and are not dismissing her thoughts. When refusing to bathe or change her clothes, reapproach in 10-15 minutes and report to registered staff. The resident will cry and accuse staff of keeping her from her father, this could be signs of delusions. Report to registered staff. When the resident is agitated keep residents at a safe distance. Emma likes to watch tv (hockey), hand massages and likes to pray. Emma likes to attend some main floor programs such as Happy hour,	Registered Practical Nurse RN

Focus	Goal	Interventions	Position	Freq/Resolved
• Potential for Expressive Behaviour of WANDERING, VERBAL, PHYSICAL (kicked another resident, punching while giving care), SOCIALLY Inappropriate (consuming her own feces , after she spread in on the floor of her room July 12, 2025) RESISTANCE to care need, SEXUAL nature related to History of ETOH, Dementia. Revision on: 07/13/2025 Revision by: Jenny Liu (RAI Coordinator)		• TRIGGERS leading to RESISTANCE to Care Needs of refusing to change clothing, refusal to bathe, refusal to eat, refusing medication, etc. as expression of behaviour include confusion, misunderstanding care needs, poor judgement, fearfulness, paranoid thought process, etc. Revision on: 10/26/2023 Revision by: Katie Wolters-Savo (RAI Coordinator) • RESISTANCE to Care Need: If Penny is declining to bathe, change clothes, take medications, eat, etc. re-approach in 10-15 minutes. Report episode to Registered Staff. Revision on: 10/26/2023 Revision by: Katie Wolters-Savo (RAI Coordinator) • SOCIALLY Inappropriate Behaviour: If Penny is noted to make loud disruptive or disrobe or "dig" into her brief, will eat own feces. gently redirect her to focus on task at hand, to move to quieter area, etc., or distraction activity assist with reapplying clothing and assist with cleaning hands/adjusting clothing and incontinence products. Revision on: 06/09/2025 Revision by: Danielle Loreto (RAI Coordinator) • SPECIAL CONSIDERATIONS:The resident is in High Intensity for preferred accommodation. Revision on: 05/02/2025 Revision by: Ranjita Yadav (RPN) • BSO RECOMMENDATIONS:Verbal: Swearing, yelling, calling names. Triggers: Pain, environmental noise, invasion of personal space, other residents touching her stuff (coloring supplies). Recommendations: Utilize art work as a form of distraction and to change her mood as needed. If the resident is insulting don't take it personally. Use humor to re-direct statements. Internal BSO has placed a sign on her door to keep door closed at all times so residents don't wander into her room. Refusing Care: Refusing to change, shower. Triggers: Pain, confusion. Recommendations: Suggest no more than 2 team members at a time for care to prevent over stimulation. One team member speaks in a soft tone the steps being done with the other team member standing by but not speaking. Encourage independence as much as possible during care. Ask resident to take off her own clothes. Ask resident to hold cloths/towels during care to prevent physical expressions..

multiple threats to strangle team members, wrapping a call bell around his own net to demonstrate how he could use it as a weapon, saying that there are many weapons in the housekeeping room, hitting team members, throw his personal belongings on the floor, threw boxes of brief to staff related to decrease cognitive impairment Revision on: 10/20/2025 Revision by: Jenny Liu (RAI Coordinator)	Target Date: 01/29/2026 • Mark will be supported to adjust to his new environment to lower risk of triggering former RESISTING CARE, treats to others, touching others, physical behaviours, verbal behaviours, socially inappropriate, sexual comments through to the next review. Revision on: 08/15/2025 Revision by: Danielle Loreto (RAI Coordinator) Target Date: 01/29/2026	Resident has history of choking a nurse. On August 4th 2025- Grabbed keys around a nurses neck. The resident grab the keys and would not let go pulling and walking away making the strap around my neck tight. Intervention: Asked several times for resident to let go, then writer had to yell for help, two male staff and charge nurse assisted to remove keys without the quick release, from around writer's neck. Time, Frequency and # of Staff: 3 staff assisted incident was over in 2 to 3 minutes and then the resident said sorry for scaring you. Evaluation of Intervention: Resident was not redirectable did not follow direction and was laughing and smiling the whole time he was asked to please let go of the keys. History of choking a nurse prior to admission to the home. Making threats t choke residents and team member. Going up to residents and rubbing his hand across their necks. Demonstrating how a call bell can be used a weapon by placing it around his own next and asking the team to look at how it can be used. Removing call bell from the wall and taking it to the team and stating he could strangle them with it. IMMEDIATELY CONTACT THE CHARGE NURSE IF THESE BEHAVIOURS ARE PRESENT. CALL CODE WHITE IF THERE IS THREAT OR SUSPECTED THREAT.
