## Care Plan Report

Focus	Goal	Interventions	Position	Freq/Resolved
<p>• Altered ability to complete Activities of Daily Living (ADLs) related to cognitive impairment secondary to Dx Dementia. Revision on: 09/27/2023 Revision by: Arun Voleti (PT - Physiotherapist)</p>		<p>Strategies from BSS Team-</p> <p>1. Continue to implement a toileting routine/schedule for SS. Consider proactively providing toileting opportunities for SS ? for example: offer to provide toileting even before he shows signs that he needs to go. Try to adhere to a regular schedule, such as hourly or every two hours (whichever is most doable for LTC staff) to increase his opportunities to void in the toilet and reduce the chances he will void while walking in the hallways</p> <p>2. Conduct a regular/scheduled check-in with SS to ask if he is OK or needs/wants anything and respond accordingly, as required. This check-in could align with the toileting schedule (e.g., check in with him hourly) and proactively meet his needs.</p> <p>3. Pay attention to cues that indicate that SS needs to use the bathroom ? for example: when he is observed touching his front or back part of his body around his perineal area, this means that he may need to use the toilet and assisted to be changed. Invite SS to follow you and walk toward the washroom.</p> <p>Revision on: 12/14/2024 Revision by: Adedoyin Folowosele (RN)</p> <p>• TRANSFERRING: Mr. Shahrebani is able to transfer from to bed by himself if he feels like. Requires 1 staff to provide Extensive assistance with transfers when he does not feel like participate with transfers Revision on: 08/29/2025 Revision by: Irina Foursova (RPN)</p> <p>• ORAL CARE: Mr. Shahram requires 1 team member to provide TOTAL assistance for oral hygiene.</p> <p>Staff to provide oral care twice daily.</p> <p>Has dentures but refuses to wear.
