## Care Plan Report

Focus	Goal	Interventions	Position	Freq/Resolved
<p>• Potential for Expressive Behaviour of EXPLORING, PHYSICAL, and RESISTANCE to care need nature related to Symptom Progression of Dementia/Alzheimer. Resident received Physical aggression from co-resident.  Revision on: 07/15/2025  Revision by: Rajwinder Kaur (Registered Nurse)</p>		<p>Revision on: 03/12/2025  Revision by: Irina Foursova (RPN)  • EXPLORING: Permit Gary to safely roam in common area. Redirect away from exit doors, elevator or other resident rooms as needed.  Revision on: 12/17/2024  Revision by: Irina Foursova (RPN)  • MEDICATION: Administer medication for therapeutic treatment of Expressed Behaviour as per MD Order. Monitor effectiveness and for side effects.  Revision on: 12/17/2024  Revision by: Irina Foursova (RPN)  • BSO RECOMMENDATIONS:</p> <p>-If a resident appears visibly agitated, staff should assess for hunger and offer a snack orange juice or coffee, any sweet snack i.e. chocolate  -If the resident is engaging in extensive exploration, staff should offer an activity.  - Redirect the resident when he seen near EP (238-1) if visibly agitated.  -Redirect the resident when he seen near JS (211-2) if visibly agitated.  &gt; Administer the prescribed PRN medication at the earliest signs of agitation, as per physician's orders.  &gt; Monitor and document the resident's response to the medication, including effectiveness and any observed side effects.  &gt; Gary typically wakes up around 5:00 or 6:00 AM. Once morning care is provided, staff should offer him a bowl of Rice Krispies cereal with milk and a glass of orange juice, served in the dining room.  &gt; When Gary appears to be exploring the neighborhood, it may indicate boredom. Staff should redirect his attention by offering a simple task or involving him in light activities, such as assisting with the snack cart or helping to set up the dining room.  &gt; Gary is an excellent reader. Staff can offer him a book, which he will enjoy reading aloud.  &gt; Noise is trigger, staff to immediately redirect or move Gary to a less noise or stimulating room if appear to be agitated. ## Care Plan Report

Focus	Goal	Interventions	Position	Freq/Resolved	
<p>• Potential for Exhibits expressive Behaviour of history (Making disruptive noises around the unit), VERBAL aggression (arguing with co-resident), PHYSICAL and RESISTANCE to care need (Refusing medications), taking down articles from the wall, related to dementia, TBI</p> <p>Revision on: 01/15/2025 Revision by: Irina Foursova (RPN)</p>		<p>• TRIGGERS leading to SOCIALLY Inappropriate (disruptive vocalizations) as expression of behaviour include</p> <ul style="list-style-type: none"> <li>- confusion</li> <li>- decreased insight.</li> <li>- poor judgement</li> <li>- limitation in communication</li> </ul> <p>Revision on: 09/30/2025 Revision by: Daniela James (BSO - Internal)</p> <p>• SOCIALLY Inappropriate Behaviour: If Basgoran is noted for making loud disruptive noises around the unit, gently redirect him to focus on task at hand (offer puzzle activities) or escort to quieter area.</p> <p>Revision on: 09/30/2025 Revision by: Daniela James (BSO - Internal)</p> <p>• BSO RECOMMENDATIONS:</p> <ul style="list-style-type: none"> <li>&gt; Redirect Bas whenever appeared to be visibly agitated around HS, MC, GG, PE.</li> <li>&gt; Bas loved fixing things, offer personalized activities that match the resident?s interests and past hobbies Legos, montessori games..</li> </ul> <p>&gt;Disguise medications:- All shift Nurses can mix the meds in any of the following a fruity rite,coffee,chocolate milk, thick pudding that has chocolate, butterscotch and vanilla flavours.</p> <p>&gt;Adjust the scheduled medication time:- Instead of giving medication at the scheduled time that co-residents receive medications, try giving it at snack time or first thing in the morning. this will make him less suspicious.</p> <p>When you present him with meds mixed in a food/ beverage (e.g., fruit rite) give him a reason. Tell him what it is for which may help increase acceptance. For example, "for pain" or "for bowel movement" etc.</p> <p>&gt;Re-Approach:- When he refuses, re-approach later. For example, If you approach at 8AM and he refuses, try again in 30 minutes to an hour. When he is re-approached shortly after, this can cause him to get agitated.</p> <p>&gt;Validation therapy:- If he is upset instead of asking why you are upset,Say "I can see you are upset,how can I help you, how can I help you to feel better?".</p>	PCA Registered Practical Nurse
